MOE-BOYD

The marriage of Martin J. Moe, of Jenner, Alta., to Mary Boyd, of Lake Louise, Alta., was solemnized by the Rev. G. G. Pybus, at the Manse, on Monday evening, July 19, Mr. and Mrs. Moe returned to Jenner, on Tuesday. Best wishes are extended.

Miss Helen Shepherd returned from Calgary, on Sunday, via Medicine Hat.

Announcement

Having acquired the JEWELRY BUSINESS of B.L. Dawdy & Co., I wish to take this opportunity of soliciting the patronage of the town and district. I aim to give my personal attention to all business entrusted to my care, and seek the pleasure of your acquaintance.

Sincerely,

J. A. TOOMBS

Says Long Term Leases Not Granted

We are in receipt of the following letter, which is self explanatory, and concerns the "loose land" lying between Bindloss and Cavendish:

"From W. W. Cory, Office of The Deputy Minister of the Interior, Ottawa, Canada, June 25, 1920.

Dear sir: I beg to acknowledge the resolution forwarded to me by Mr. F. E. G. Brown, passed by the Convention of Division No. 2, of the United Farmers of Alberta, protesting the granting of long term leases, on townships 20, 21 and 22, range 3, west of the 4th meridian.

I may say in reply that these townships comprise a Re-mount Reserve; that no long term leases are being granted, but under arrangement with the Department of Militia and Defence, we have entertained applications for yearly grazing permits on the greater part of the Reserve.

We have given the permittees no assurance that they will be given renewal permits.

Yours very truly,

W. W. Cory,
J. Gilliam, Secretary,
Division No. 2, of the Medicine Hat District Association, Cavendish, Alberta."

GUN CLUB TOURNAMENT

Charles Harris, of Cabri, held high gun in three "25 Bird" events, breaking 64 out of 75. Visitors were present from Cabri, Estuary and Abask.

Funeral of the late Mrs. Alfred Sturgeon

The funeral of the late Mrs. Alfred H. Sturgeon, whose death was announced last week, took place on Thursday, July 15th, at 10:30 a.m. from the family residence near Sharrow. A brief service was conducted by the Rev. G. G. Pybus and the large number of sympathetic friends and neighbors who assembled at the service and followed the remains to their last resting place in the Empress cemetery bore fitting testimony to the esteem in which the deceased was held. Mrs. Sturgeon who was in her 36th year had suffered for some time from anaemia and patiently endured the waning of her strength until the end came. She was the daughter of Mr. and Mrs. D. A. Smith, of Fincher Creek, Alta., who were present at the funeral. A sister, Mrs. F. B. Lamb and Mrs. A. E. Sturgeon were also present. Beside these and the sorrow bereaved husband, the deceased leaves two young children, Dexter Alfred, aged two years, and Robert aged five months, to all of whom the heartfelt sympathy of the entire community is extended.

Re Harvest Help

Farmers requiring harvest help should figure out the number of men required and advise Secretary Blodgett, of the board of trade, as to the number, and probable date of starting harvesting. An arrangement is to be made with both the Alberta and Saskatchewan departments of Labor to have the necessary harvest help supplied for the district. Farmers filing requests for men from outside and who are fortunate enough to secure help locally in the meantime should at once notify the secretary so that their requirements may be cancelled. There is to be no charge in connection with this service and the farmers should make an earnest effort to co-operate with the Board in this connection.

A Welcome Rain

After a week of excessive hot weather, prolongation of which meant much serious destruction to the crop, relief came in the form of a severe electrical storm on Wednesday night. The display of forked and sheet lightning was both fearsome and beautiful. In gusts of wind and the heavy beating of rain on roofs and buildings followed. The advent of the rain was a relief to all and means the saving of thousands of bushels of grain to this district.

Empress View and Glavannah Picnic

Empress View and Glavannah U. F. A.'s celebrated their first annual picnic on Friday last. The day was oppressively hot, the thermometer mounting to somewhere in the nineties. This had a decided effect on the attendance which would have been larger had weather conditions been more congenial. The larger part of the day was taken up in baseball. Mayfield defeated Lloyd George and Empress View won from an Empress team. The game played after supper between Empress View and Mayfield was a pitching duel between McBain for Mayfield and Arneson for Empress View. Mayfield took the game although the pitching of Arneson was especially good. The dances which concluded the day's entertainment was well attended.

"The Brute Breaker"

Frank Mayo and Kathryn Adams share honors in "The Brute Breaker" the Universal story of the north woods. In the production Mayo depicts the role of a young chap who inherited a vast woodland principality and set out to rid the camps of the bullies who were making life miserable for the residents.

EXTRA STEPS MEAN DOLLARS SAVED

Natural Resources Of Western Canada Of Untold Value

Sir John William, in a speech delivered before the Canadian Club at Halifax, and dealing with the financial outlook for Canada, gave some interesting facts and figures regarding the potential wealth of this Dominion. Speaking particularly of the undeveloped wealth of the western provinces he said in part:

It is established that in Saskatchewan there is clay for earthenware which would afford the raw material for pottery industries. Indeed, according to one of the provincial ministers a company is now producing first class articles of clay manufacture. A discovery of white granite near James Bay is reported, which with large deposits of felspar make it possible for Ontario to produce pottery of glass, fine china and ornamental glassware. But we should have greater knowledge of these clay and that we can only acquire by scientific and industrial research. There is no doubt that the return from the fisheries could be enormously increased. The council for scientific and industrial research estimates the loss in roffids, comprising chit and proteins, in the 200,000 tons of waste that is thrown away annually, at \$100,000,000 and in oil at \$2,000,000. These discoveries alone increase the value of the fisheries by 25 per cent. The council is engaged in experiments to determine the commercial feasibility of utilizing the waste lignite deposits of the prairie provinces. If these experiments are successful, as they promise to be, not only will industrial development follow, but an annual saving of \$18,000,000 involving, at the present value of the dollar, a loss of \$1,750,000 will be effected through the substitution of lignite for coal now imported into Western Canada. There are \$7,000,000,000 tons of lignite in Saskatchewan and even a greater quantity of the better grade of this fuel in Alberta. Extensive use, on a scale of valuable by-products will provide raw materials for native industries, and in these provinces not only will the waste of the Dominion be saved, but the waste of the vast stores of energy locked up in these lignites will be made available for industrial and agricultural purposes.

One cannot believe that the West has a coal production as small as that of the Atlantic provinces, which continue to import coal from Pennsylvania. Alberta alone has 16 per cent of the world's total coal supply. Industries in Winnipeg have discovered that coal from Alberta is a satisfactory substitute for the imported product. It is certain that western coal will also be utilized for domestic purposes. Experiments in wheat breeding produced Marquis wheat, the staple wheat of the west, and now the research council is trying to discover a variety of wheat which will ripen early, be wholly rust-resistant, and have good milling and baking qualities. A new process of making bauxite from waste straw in Saskatchewan has been discovered from which it is believed a great industry will develop. A substantial monetary saving to western farmers is effected. The research council is seeking to discover a method of utilizing the thousands of tons of waste straw which from year to year are burned in the prairie provinces. The fact that we import iron and steel to the value of \$15,000,000 should stimulate exploration and research in Canada. Ores which have practically been discovered in the last few years are now in high demand. It cannot be doubted that we will develop mines in Canada or methods of treatment which will prove more profitable than dependence upon foreign supplies. The natural resources branch of the department of the interior has just prepared a memorandum on the subject of molybdenum. This steel is claimed to be the lightest and strongest that has yet been produced. It is said there are over 100 known sources of molybdenum in the Dominion, which will provide very profitable results. One mine in 1916-17 produced more than any other individual mine in the world. In 1918 the total production of Canada was 450,000 tons which was one-third of the world's production. And it is stated that Canada is in the most favorable position in the empire to supply this metal. In remote northern Manitoba, beyond the Saskatchewan and into the Athabasca valley, a large deposit of molybdenum was cut in the value of \$163,000 and was taken to the value of \$1,807,000. One particular property of this molybdenum is said to contain 20,000,000 tons of copper ore valued at \$180,000,000.

Some Facts About The Far North

Stefansson Deplores Lack of Knowledge of Canadian People

Regarding North America, the ignorance on the part of Canada people regarding conditions in the far north is due to the teaching on the subject in Canadian schools, according to Vilhelm Stefansson, the noted explorer, says the Winnipeg Free Press. These wrong impressions received in childhood are very hard to uproot, he pointed out.

There are 640 different species of flowering plants, and roughly three times as many flowering plants as non-flowering plants in the Arctic country, according to Mr. Stefansson. In the north, he explained, there are two seasons similar to the seasons of the settled part of Canada.

Just as grass cannot grow here, so wheat cannot grow in the country around the river of the Arctic circle in the winter. But in the summer, one can find Kentucky blue grass, which is the most prevalent among the vegetation up there, golden rod, poppies, blue-bells, dandelions, timothy and watercress, "and these plants grow as far north as any land that has been discovered." As a part of a gradual and general movement, the northward has been under way for a considerable time. Recent declines are not to be viewed as isolated instances, but as a part of a general movement, the degree to which it is affected being determined by conditions in the national and international market for that specific commodity.

Visiting Land in Far North

First Trip of Season to Fort McMurray Carries Notes

Noted soldiers, financiers, big game hunters and globe trotters, as well as men prominent in the north, were passengers on the first train of the season over the Alberta and Great Western railways to the northward. Among the prominent passengers who are making the trip, most of them going right through to the north, are the MacKenzie River, some 1,200 miles north Edmonton are: M. Stas, a prominent financier of Belgium; A. C. Conroy, of Ottawa, an Indian agent; D. K. Miller, of Milwaukee, globe trotter and big game hunter; George Boucher, of Toronto, a big game hunter; and J. H. Smith, who is taking the treaty money to the Indians at that district, and many others. The northward train will meet the train at the start on its long trip down the MacKenzie River to the land of the midnight sun.

Canadian Fisheries

People of Canada Should be Educated to Eat More Fish

The fisheries of Canada represent an asset of \$5,000,000 and are capable of enormous development. If the people of Canada could be educated to eat more fish, was a statement made by A. H. Bruce, president of the Canadian Fisheries Association and vice-president of the Maritime Fish Corporation, who passed through Winnipeg on his way to the conference from the fisheries convention at Vancouver. Mr. Bruce stated that if Canadians would eat more fish that a considerable stride would have been taken to fight the high cost of living. "Fish is declared to be the cheapest food in Canada today and only a small percentage of the fish products of Canada are consumed in the Dominion. The majority is sent to the United States, South America and West Indies."

Bath Tub Prohibited

Medical Authorities Attacked It As Dangerous to Health

The first bathtub in the United States was installed in Cincinnati on December 20, 1846, by Adam Thompson. It was made of mahogany and lined with sheet lead. At a Christmas party he exhibited and explained it and four guests later took a plunge into it. The next day the Cincinnati paper devoted many columns to the new invention and it gave rise to violent controversy. Some papers designated it as an epidemic luxury, others called it unbecomingly, as it lacked dignity, and the prevailing health authorities attacked it as dangerous to health. The controversy reached other cities and in more than one place medical opposition was reflected in legislation. In 1843 the Philadelphia common council considered an ordinance prohibiting bathing between November 1 and March 15, and this ordinance failed of passage by two votes. During the summer of 1846 the city of New York laid a tax of \$30 a year on all bathtubs, which might be set up in Hartford, Providence, Charleston and Wilmington, and very soon thereafter water rates were laid on persons who had bathtubs. Boston in 1845 made bathing unlawful except on medical advice, but this ordinance was not enforced and in 1862 it was repealed. In 1850 a bathtub was installed at the White House.

Unusual Mine

Extends Three or Four Miles and Produces Fuel of Good Quality

A coal mine which delivers its products in loads that travel over an aerial cable to the hold of a vessel is probably unique, also is a coal mine within the Arctic circle which cuts its coal to other zones during the brief summer season when a mine is unroofed. Such a coal mine, says a writer in the World (London), is now being operated by an American company on the island of Spitzbergen, and some 800 shiploads of fuel were exported during the open season of last year. The mine overlooks Advent Bay, and instead of driving the shafts vertically into the earth the operators have driven them almost horizontally into the side of the mountain, opening up a coal mine that extends three or four miles and produces fuel of good quality from galleries in which the temperature goes no higher than 42 degrees Fahrenheit, and the prevailing cold makes the walls so firm that no occasional prods need be left to support them. Everywhere the mine develop this Arctic coalfield had to be brought from a distance and the building materials was landed from sailing between November 1 and March 15, and this ordinance failed of passage by two votes. During the summer of 1846 the city of New York laid a tax of \$30 a year on all bathtubs, which might be set up in Hartford, Providence, Charleston and Wilmington, and very soon thereafter water rates were laid on persons who had bathtubs. Boston in 1845 made bathing unlawful except on medical advice, but this ordinance was not enforced and in 1862 it was repealed. In 1850 a bathtub was installed at the White House.

Whenever a large town in the British Isles changes its source of water supply, it is taken by the water purveyors in order that the right blend of tea may be made to suit that particular water.

The Decline In Prices

Gradual and General Movement Toward Lower Price Levels

Recent declines in the prices of a few commodities are not to be regarded as isolated instances, but are part of a gradual and general movement that has been under way for a considerable time, the National Bank of Commerce in New York has in a discussion of current business conditions.

"It has generally been conceded," says the statement, "that prices would ultimately seek a lower level than that maintained during the war and immediately thereafter. Such decline has always followed the over-inflation of money and industry produced by war. Under these circumstances, a downward price movement, if gradual and orderly, is to be welcomed both as an evidence of the return of more orderly conditions and as a factor in accomplishing that return. Such a movement in the price of basic commodities, however, is likely to cause the business public to lose sight of the fact that in a number of other commodities a gradual decline has been under way for a considerable time. Recent declines are not to be viewed as isolated instances, but as a part of a general movement, the degree to which it is affected being determined by conditions in the national and international market for that specific commodity."

Alberta Coal in Poland

Passenger Measure 78 Miles at 1,000 Feet Underground

About eight miles from Cracow, that interesting old university town of Poland, a wonderful sight has been seen just about a thousand feet below the surface of the ground, a place where one can walk for an hour seeing new sights, coming up on great halls with pillars and carvings, little chapels, with modeled figures, huge chambers, some a hundred to a hundred and twenty feet in height, dark mysterious ponds which are seen in boats, galleries looking down into fathomless pits, with stairs leading from one level to another, all cut out of salt, for the salt miners of Wieliczka are on certain occasions thrown open to the public and are let up for the benefit of the visitors by kerosene lights which make a most wonderful effect in this city of salt. Most people think the dazzling whiteness of a salt mine will be overpowering, but except when some new cut salt is seen or some little statue added to a chapel, or a design to a wall, the salt is of a drab gray color, but always is impressive from the solidity of its surface. There are said to be an aggregate length of over 100 miles of galleries, and some are so narrow that for protection to their clothes, every one puts on overalls.

Growth of Dairy Industry

Saskatchewan Dairy Association Is Out for More Members

Creamery patrons throughout the province are being urged by the secretary treasurer of the Saskatchewan Dairy Association to join the association and also the national dairy council of Canada. In an effort to increase the membership of the Saskatchewan association circular letters are being sent out all over the province.

Sodium Sulphate Deposits

Wealthy American Syndicate Making Bid to Secure Valuable Mine

The rich sodium sulphate deposits located north of Ceylon, Sask., and which were secured some time ago, are now to be extensively developed. The Ceylon Sodium Sulphate Co., which was formed for the purpose, is said to be the purest sodium sulphate mine in the world. Four or five by-products can be obtained by the refining process.

Air Patrol Effective

The immense army aeroplanes now sweeping hourly over the great Santa Barbara forest have saved it from serious fires. Recently one of them flashed a wireless message which was picked up at two different signal corps stations, and telephoned into the Santa Barbara and Los Angeles forestry offices within ten minutes after a 15-acre blaze was first sighted.

Wheat Board Will Be Reorganized and Given Wider Power

In reference to the continuance of the Canadian wheat board for another session, the resolution provides that the governor-in-council may appoint a board to be designated "The Canadian Wheat Board," which shall consist of not more than twelve members, including chairman and vice-chairman.

The board may make enquiries and investigation as it deems necessary to ascertain what supplies of wheat are, or may be, available from time to time, the location and ownership of same, the transportation and elevator facilities available in connection with it, as well as all conditions connected with the marketing of wheat at market price than can be obtained for the same. For the purpose of any enquiry or investigation, however, by the board, the board and several members thereof shall have the powers of a commissioner acting under Part I of the Inquiries Act.

In the schedule of powers the board is given authority similar to that of a commissioner as regards purchase, storage and transport of wheat, and to sell wheat, in excess of domestic requirements to purchase wheat at such prices as may be obtainable. The resolution gives the board authority to fix maximum prices for wheat, and to fix standards for such products.

It may purchase flour from millers at prices to be fixed by the board and sell the same in Canada and other countries. For the purpose of performing its duties the board may allocate Canadian lake tonnage and distribute cars for rail shipments. The issue of participation certificates and payment of advances is provided for in the resolution, as also is the distribution pro rata after sale of all wheat and deduction of administrative expenses.

The board is given power from time to time to appoint an executive committee of not less than three of its members of whom the chairman will be one, and may assign to such executive committee any duties or powers which may be within the competence of the board. It is provided that there shall not be provided any grain exchange or elsewhere facilities for trading in wheat futures during the time the act based upon these resolutions is in force, except by permission in writing of the board.

Notwithstanding any order-in-council that may be issued, the board of grain supervisors of Canada shall not hereafter exercise any powers in excess of those powers vested in the Canadian wheat board by the proposed legislation.

The proposed act shall continue in force until the expiration of the act, or the prorogation of the next session of parliament.

The proposed act shall continue in force until the expiration of the act, or the prorogation of the next session of parliament.

The Place to Go Where Fishing Abounds

Alberta Fishing Streams Are to be Restocked by Government

That Alberta streams have the finest fishing from a sportsman's point of view in Canada, is the opinion expressed by G. S. Davidson, chief inspector of fisheries for the western provinces and the northwest territory.

It is the policy of the fisheries department," said Mr. Davidson, "to close all small streams, which are the spawning ground of most of the game fish, for two years, and to make every effort to restock them and bring them to their former standing, and to have the assurance of the department of fish culture, that everything possible will be done in the matter of restocking the streams."

"Alberta will soon be the greatest fishing country in Canada," said Mr. Davidson, "the north country streams and rivers are fairly good. An application is now before the department for the granting of a license to a Canadian concern for the fishery rights in the Athabasca district, which is being looked into. The applicants for the fishing rights say they will catch and export 70,000 pounds of fish daily to the Canadian markets."

About Potatoes

The man who raises his own potatoes is much surer of having potatoes to eat the coming winter than is the farmer who puts his eggs in the basket watching the ball games and riding in automobiles—Ontario Press.

The finest emeralds known are owned by the Rajah of Patna. He has a turban ornament ten inches long and set with diamonds. The lower edge is fringed with large pear-shaped emeralds, which are almost priceless.

Silver coils have now entirely disappeared from circulation in Germany owing to the extraordinary rise in the price of silver.

Sugar Beets in Alberta Advocated

High Price of Sugar Should Make Crop Very Profitable

That Alberta could make a factor in the sugar beet industry of the world if the farmers in many parts of the province, especially where the lands are irrigated or where there is alkali, would grow sugar beets, is the opinion of the British Columbia commissioner for the province of Alberta. In backing up his statement Mr. Grant said that the sugar farmers in the Salt Lake City district are making a profit of \$12 on every 100 pounds of the refined product, and that there is no reason why Alberta farmers should not do the same.

The sugar beet industry was introduced into Alberta some years ago by the Mormons who settled near Raymond, Alberta. The crop returns more than met the expectations of the sugar farmers, but when it came to disposing of their crop, they found that the refineries would pay but very low prices. Conditions, today, however, are entirely different. The price is then. The shortage of sugar has been felt all over the world in the past two years, and the prices per pound at the present day are more than three times higher than they were some years ago.

Montreal Ninth City of Continent

Montreal is now the ninth, and Toronto the twelfth city on the American continent, the Canadian cities being passed in order of the American cities in the past few years. Here are the populations of the twelve leading cities: New York, 5,621,151; Chicago, 2,790,243; Philadelphia, 1,440,000; Detroit, 993,739; Cleveland, 796,860; St. Louis, 774,000; Boston, 747,031; Buffalo, 734,316; Montreal, 616,000; Pittsburgh, 588,193; Los Angeles, 572,480; Toronto, 515,000.

Men are trapped in order that women may wear furs, and women wear furs in order that they may be trapped.

Discontinuance of Wheat Board A Matter of Dissatisfaction

The news that the Canadian Wheat Board will not handle the selling of the 1920 wheat crop has been received with suspicion and dissatisfaction by the bulk of Alberta and Saskatchewan farmers. The lean crops of the past three years have placed the farmer in a position that the holding of his grain is practically impossible. The inflated prices of general commodities have in-

creased his obligations 100 p.c. or more, and the outlook is that merchants and banks will require a general settling up where possible, this fall. This condition of affairs forces the small farmer, who in the majority of instances stands most in need of help, on to the early market and places him at the mercy of the speculator who has the finances for huge buying and warehousing.

Norman P. Lambert, secretary of the Canadian council of agriculture, says—"In re-establishing open trading in wheat, the government shows quite plainly that it prefers to gratify the wishes of a few grain merchants, rather than the wishes of 200,000 organized farmers. The attitude of the farmers was made clear by the resolution in favor of continuing the wheat board, passed Wednesday by the council, representing all the organized farmers of Canada.

"At a meeting held January 5,

in Winnipeg, the council declared in favor of the national marketing of wheat retained as long as the principal countries importing Canadian wheat retained government control of their imports and distributions.

"These abnormal conditions still continue, and will continue for another year, so the council again passed a resolution requesting the federal government immediately to re-appoint the existing Canadian wheat board for the purpose of marketing the wheat crop of 1920. In making this request the council pointed out that it expected the wheat board to do only what has been done in the marketing of the 1919 crop, namely to secure for the producers as nearly as possible, the full world market value of their wheat, without exacting for the benefit of the producers any special advantage from the consuming public.

"This reasonable resolution, indicating the wishes of the farmers, was forwarded to the government, but on Friday, announcement of open trading in wheat was made. The authorities cannot claim that there was any doubt as to the attitude of the men who grow wheat."

Near-drowning Accident

A near-drowning accident occurred at the Empress beach on Sunday. Two Alaska men being pluckily rescued from drowning by the assistance of a friend and another gentleman. Artificial respiration had to be resorted to. The dangerous nature of this swimming place requires that warning boards should be erected and a lifebuoy placed there by the town—in the absence of any other authority. While this will not insure absolute safety to bathers, it might be the means of preventing fatalities. We have advanced this suggestion before, and believe it is incumbent upon the town that some such precautions in the interests of the people should be taken during such time as the bank of the river at this spot is used as a public picnic ground.

PROVINCE OF ALBERTA

HELP YOUR PROVINCE

6 PER CENT GOLD BONDS

By purchasing bonds of the Province of Alberta.

While securing the highest class of investment procurable you at the same time aid your Province to provide for the building of its Public Works and Telephones in the most effective way.

Financing by the issue of bonds within the Province results in the distribution of the interest amongst our own people.

If you encourage this idea, you help your Province to become less dependent on outside money markets.

Interest is payable half-yearly—1st of May and 1st of November—by coupon.

Bonds are in denominations of \$100, \$500 and \$1,000.

Remittances should be made by marked cheque, money order or postal note.

These Bonds may also be obtained from any recognized bank house in the Province of Alberta.

Write for fuller information to Deputy Provincial Treasurer.

HON. C. R. MITCHELL,
Provincial Treasurer.

W. V. NEWSON,
Deputy Provincial Treasurer,
Parliament Buildings, Edmonton, Alberta.

Farmer's Column

BINDLOSS

The crops in the Bindloss district are fairly well advanced, most of them being headed out. The heads are of a medium size and a fairly good crop is expected. A good rain would help the crop.

A heavy rain, which did not last very long, fell on Friday afternoon, refreshing the grain.

The heat of the past few days has been such, that most of the farmers are summer-fallowing late in the evening, owing to the fact that some horses got sunstroke.

Messrs. H. Fjeldberg, Nicholbeck, Fred Strom and Westberger left on Thursday morning for the north. They went by car via Alaska and Saskatchewan to North Battleford. They are prospecting for another country.

Messrs. Falconer Bros., who lately traded horses for Mr. H. England's tractor, are working day and night. Their intention is to plough as much as possible to get the land ready for Fall Rye.

The gardens with the exception of a very few are doing nicely. Potatoes are doing good. Mr. Fred Strom had the misfortune to bruise one of her feet, by a cow having the impertinence to step on it.

Mr. Frank Lydsman is putting up a cross fence on his farm. The same farmer is digging a well on his place.

And is Bindloss not going to have any picnic at all? What's the matter with the town people? Every town or municipality has had its celebration, is Bindloss going to stand back? Surely not!

Mr. Sarvis is fencing in the school section south of Bindloss. Some job these hot days.

Our crops are not very plentiful this year; very few good fields of this cereal can be seen; better raise the price another 10c. George.

Mr. Moore has been putting a fence around his yard. He has also been painting the buildings, and the whole has altogether a nice and different appearance.

Mr. McDonald, our most appreciated blacksmith, has been pounding shares for the last three or four weeks, and by the looks of his shop he will be a little while yet before he is done.

A telephone crew has arrived in the district from Morris, Sask., 51 miles of telephone are now under construction. We'll have to learn different languages.

Messrs. Spausen and Boes, made a trip to Empress and also north of the River to see their friend, John Payens and family.

29, w 3rd. Payment to be the
upset price of \$30 per acre.

Jones.—That this Council re-
quest the Wild Lands Tax Com-
missioner to rebate the tax on
on 8, 26, 27, w 3rd, paid under
protest by A. Bersen, for rea-
sons stated.

Ardell.—That the land ac-
quired for cemetery purposes

on N.W. 28, 26, 27 be known as
the Mantario cemetery and
that the prices for plots be—
tull plot, \$20; half plot, \$10;
single graves, \$4.

Beynon.—That Coun. Jones
be a committee to have the
Mantario cemetery fenced. The
fence to consist of woven wire
48, 50, high posts one rod apart
and one strand barb wire on
top and two gates.

Rowles.—That this Council
now adjourn to meet again at
the usual hour and place on
Saturday, August 7.

Ratepayers please note Court
of Revision will sit at the
Orange Hall, 10, 23, 29 w 3rd,
Saturday, July 17, at 10 a.m.
All appeals must be in the
hands of the Assessor before
that date.

A new departure in road
building has been undertaken
in the Dauphin district of Man-
itoba. The new method does
away with the use of horses
and wagons for hauling the
gravel from the pits. The equip-
ment consists of light railway
tracks, gasoline donkey engine,

steel dump cars and a steam-
shovel. The tracks can easily
be taken up and relaid as each
section of the road is finished.
It is estimated that the time re-
quired to construct the 175
miles contracted for will be
from two to three years.—Ex.

In The Privileged Class

The new curate was to preach
his first sermon, so naturally he
was very desirous of looking
his best. Arriving at the vestry,
he found to his chagrin that it
contained no mirror, so seeking
the sexton, an old Scotaman, he
asked in low and nervous tones,
"Er, James, can I—that is, do
you think you could get me a
glass?" With a shake of his
head, James disappeared, re-
turning in a few minutes carry-
ing something under his coat.
Withdrawing his hand he
brought to light a large black
bottle which he presented to
the curate, saying at the same
time, "Ye mauna let on about it,
for I got it as a special favor,
an' wadna has got it at al' if I
hadna told 'em it was for you."

Old London Not Crowded
Many journals are testifying stories about the alleged overcrowded state of London, Eng., hotels for the present season. London is certainly full, but information is that with red carpeting of the swaggers places, there is room for the less ambitious visitors, while flats are available for a period and are actually stamping well-known Canadian traffic manager says real tourists are not as numerous as expected, the majority of the visitors having definite business other than mere sight-seeing.

Wheat Prospects
The Europeans cannot afford to go on buying food for which they cannot pay, no more can they afford to neglect their own fields, where they have the means of self-sufficiency. The French expect to harvest almost enough wheat this summer for their needs in the year ahead. The British are busily restoring the exports that assure them their wheat from Canada, Australia and South America. The people of Austria and certain other sections of middle Europe will remain in need for a time, of wheat that they have not the means to buy. But the problem of feeding them should diminish a little by little.

"My Back Is So Bad"
PAINS in the small of the back, lumbago, rheumatic pains in the limbs all tell of defective kidneys.

Poisons are being left in the blood which cause pains and aches.

The kidneys, liver and bowels must be aroused to action by such treatment as Dr. Chase's Kidney-Liver Pills.

There is no time for delay when the kidneys go wrong, for such developments as hardening of the arteries and Bright's disease are the natural result.

One pill a dose, 25 cents a box, all druggists, or by mail, Dr. Chase, Ltd., Toronto.

Dr. Chase's Kidney-Liver Pills

Painting the Town

Santiago is Described As A Chaotic Jumble of Pigments
All Cuban cities offer a motley of tints, says the Century Magazine, but Santiago outdoes them all in the chaotic jumble of pigments. In a single block you find house walls of lavender, sap green, robin's egg blue, yellow, grey, saffron, deep imperial pink, old rose, light pink, yellow ochre, maroon, tan, vermillion and purple. This jumble of colors, with never two shades of the same degree, give the city a kaleidoscopic brilliancy upon the tropical sun that is equally entrancing and trying to the eye.

Some Sold to Speculators

Will Make a Fat Killing at the Expense of Farmers

The estimate is made that the Province of Saskatchewan will secure \$32,000,000 more for 1919 wheat from the cashing of the participation certificates for 400 bushels. Taking western Canada as a whole, the increased return will probably be between \$60,000,000 and \$70,000,000. It is now beginning to figure in a basis of total wheat marketed, that we appreciate properly the significance of the Wheat Board's achievement. The only unfortunate feature of the situation is that so many farmers believe that those who told them that these certificates were worth little or nothing and sold them at anywhere from 2c to 10c. The consequence is that speculators will make a fat killing at the expense. The farmers have reason to ask to be delivered from their "Friends."—Edmonton Journal.

SAY "DIAMOND DYES"

Don't streak or ruin your material in a dye box. Insist on "Diamond Dyes." They are safe in judgment.

"CORN"

Lift Right Off Without Pain

The River Oxis in Central Asia is supposed to have changed its course prior to the year 1000 and to have resumed its ancient bed in 1878.

Eight-hour Day on Farm
Farm work is not regulated by the blowing of a whistle. It is governed by the sun and the rain and the wind. An eight-hour day works well in most industries, but it is not feasible in a business where the money "Never cut off till tomorrow what you can do today," is still a vital precept.—Toronto Telegram.

Doesn't hurt a bit! Drop a little "Freezone" on an itching corn. Instantly that corn stops hurting, then it falls off. It is right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" in a sachet, sufficient to remove every hard corn, soft corn, or corn between the toes. It is painless, without caustics or irritation.

Boys' Club Director

Work Hitherto Carried on by Extension Department
The Boys' and Girls' Club work, hitherto carried on by the extension department of the University of Saskatchewan in co-operation with the provincial department of agriculture, has been taken over by the department of education and will be carried on in future under the school agricultural branch of this department. The department has just secured the services of Mr. Harry Saville, who has been appointed assistant in school agriculture for Boys' and Girls' Club work. Mr. Saville is a graduate of the University of Saskatchewan, obtaining the degree of B.S.A. in 1916. Mr. F. W. Bates is director of Rural Education and School Farms at Saskatchewan.

Asthma No Longer Dreaded—The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that confidence is placed on this truly specific with the certainty that it will always do what it is intended to do, that they have not yet learned how safe you are with this preparation at hand. It is today and know for yourself.

Nitric Acid from the Air

Private Company Will Take Over Plant in England

England will soon begin to produce in large quantities of ammonia and nitric acid made with the aid of the nitrogen from the air. A large factory for this production began during the war at the first factory at Billingham-on-Tees, near Stockton, was completed recently. It will now be transferred to private interests for operation under the name of the British Nitric Acid Co. Ltd. The factory is in England for the production of ammonia by the process, which was invented by the Germans, and has since been taken over by the research chemists attached to the staff of the Ministry of Munitions.

The company will take over the factory which will reimburse the nation for the money already spent and will invest new capital. The whole transaction represents an investment between \$20,000,000 and \$25,000,000.

The River Oxis in Central Asia is supposed to have changed its course prior to the year 1000 and to have resumed its ancient bed in 1878.

TO SAFEGUARD YOUR DIGESTION

The Blood Should Constantly be Kept Rich and Pure
If you suffer from any form of indigestion, your diet should be carefully chosen. Over-eating is always harmful, but at the same time one must take enough food to supply the needs of the blood. It must be remembered that the blood has to carry nourishment to every part of the body, find fuel for energy and defence against its enemies, as well as the requisite juices for digestion. Hence, when the blood becomes weak and fails to do its work, indigestion arises; also when digestion begins the blood still further suffers. Therefore, to keep your digestion in good blood should be kept rich and red, and this can be done by taking a course of Dr. Williams' Pink Pills. These pills are a blood-building, strengthening tonic and through their use your digestive system will respond to the tonic and you will improve and your food will do you good. The value of Dr. Williams' Pink Pills in cases of stomach trouble is shown by the experience of Mrs. J. H. Williams of New York, Ont., who says: "Some years ago I was in a terribly broken down condition and had indigestion of a severe nature, and sharp pains of agony all through the day. I was told that it was difficult to treat, but I was told that I would have something better. I was told that I would have something better. I was told that I would have something better."

America and Ireland

A Conflict Between Britain and U.S. Is Unthinkable

The worst catastrophe that could befall the world today would be a conflict between England and the United States. All hope of a league of nations would be lost, all hope of the peaceful settlement of international disputes, all hope of restoring the fabric of western civilization, so rudely shattered by four years of horrible war. The financial equilibrium of the world, now being built up by delay and enormous difficulty, would be destroyed beyond all possibility of re-establishment. Production would cease, and all classes of society, rich and poor alike, would be stinted of food and clothing. The world's Age would be stripped bare and infamy be smothered in the cradle. The ruin that overcame the world after the downfall of the Roman Empire would be insignificant compared with the results of such a cataclysm as this.

America and Ireland

A Conflict Between Britain and U.S. Is Unthinkable

The worst catastrophe that could befall the world today would be a conflict between England and the United States. All hope of a league of nations would be lost, all hope of the peaceful settlement of international disputes, all hope of restoring the fabric of western civilization, so rudely shattered by four years of horrible war. The financial equilibrium of the world, now being built up by delay and enormous difficulty, would be destroyed beyond all possibility of re-establishment. Production would cease, and all classes of society, rich and poor alike, would be stinted of food and clothing. The world's Age would be stripped bare and infamy be smothered in the cradle. The ruin that overcame the world after the downfall of the Roman Empire would be insignificant compared with the results of such a cataclysm as this.

And what about Ireland? The advocates of Irish freedom who are urging war between England and Ireland have ever had. All the misfortunes that tormented country has suffered in the past, all the miseries she endures today, would be renewed tenfold by such a world disaster. Some of us believe that the best intelligence and the most earnest conscience of England are now toiling to effect a solution of the terribly complicated Irish problem. Some of us believe that the only solution will come later be affected. All of us know that it can be effected only by mutual patience, tolerance and effort at understanding.

However this may be, it is certain that the threat of hostility from the United States will make it impossible for the solidarity which will throw the thought of justice to Ireland completely into the background. Such a solidarity will cause the misfortune of the English people and make them fight with England and Ireland both to remain a desert, rather than submit to foreign domination in their domestic affairs, exactly as the American people would fight under similar circumstances. To hope that America over England would free Ireland, is to hope for a dream; there would be no Ireland left to free and no America left to free it.—Boston Herald.

Minister—But, Hoolligan, can't you live with your wife without fighting? Hoolligan—No, sir, I can't. Leastwise not 'appily.—London Opinion.

King George receives an average of 25,000 letters a year from his subjects.

Canadian Movies

Interesting Material That Is Available Every Year in This Country Astonishing

Those who protested against the theory of moving picture theatres to depict American scenes and events of particular interest to the American people in the new features that consist of the houses supply, have been justified by the result of efforts to substitute Canadian and British subjects. There has been no lack of material for further agitation in this direction, but gratifying progress has been made. In the protest against too much Americanism in films presented to the Canadian people there was not the slightest prejudice against our good neighbors.

The amount of interesting material for moving pictures that is available every year in this country is astonishing to those who attend the movies only occasionally, or those who, when they read the news of the day, do not think of its pictorial possibilities. For example, in a Toronto theatre this week there is a picture showing the work of beavers a few miles from Toronto. The photographer has caught one of the beavers building a dam. How many Canadians have ever seen a beaver? How many have seen them falling overboard constructing their wonderful breakwaters that have been the wonder of engineers? Is a picture of this sort worth a hundred of the old kind that revealed Miss Josephine Smith, niece of the governor of California, breaking a bottle of grape juice over the head of a freckle-faced boy? The ceremonies attending the 250th anniversary of the incorporation of the city of Vancouver by the British Indians of the far north and west were presented with medals and gave one of their power-waves, were also shown on the film.

The photographers are to be congratulated upon their industry in following up the day's news, and such pictures are also due to those who led in the original protest against the surfeit of American movie features.—Mail and Empire.

America and Ireland

A Conflict Between Britain and U.S. Is Unthinkable

The worst catastrophe that could befall the world today would be a conflict between England and the United States. All hope of a league of nations would be lost, all hope of the peaceful settlement of international disputes, all hope of restoring the fabric of western civilization, so rudely shattered by four years of horrible war. The financial equilibrium of the world, now being built up by delay and enormous difficulty, would be destroyed beyond all possibility of re-establishment. Production would cease, and all classes of society, rich and poor alike, would be stinted of food and clothing. The world's Age would be stripped bare and infamy be smothered in the cradle. The ruin that overcame the world after the downfall of the Roman Empire would be insignificant compared with the results of such a cataclysm as this.

And what about Ireland? The advocates of Irish freedom who are urging war between England and Ireland have ever had. All the misfortunes that tormented country has suffered in the past, all the miseries she endures today, would be renewed tenfold by such a world disaster. Some of us believe that the best intelligence and the most earnest conscience of England are now toiling to effect a solution of the terribly complicated Irish problem. Some of us believe that the only solution will come later be affected. All of us know that it can be effected only by mutual patience, tolerance and effort at understanding.

However this may be, it is certain that the threat of hostility from the United States will make it impossible for the solidarity which will throw the thought of justice to Ireland completely into the background. Such a solidarity will cause the misfortune of the English people and make them fight with England and Ireland both to remain a desert, rather than submit to foreign domination in their domestic affairs, exactly as the American people would fight under similar circumstances. To hope that America over England would free Ireland, is to hope for a dream; there would be no Ireland left to free and no America left to free it.—Boston Herald.

Minister—But, Hoolligan, can't you live with your wife without fighting? Hoolligan—No, sir, I can't. Leastwise not 'appily.—London Opinion.

King George receives an average of 25,000 letters a year from his subjects.

To Get up in the morning tired and unrefreshed, with a dull, heavy head, often amounting to headache, to feel listless and "blue"—these are symptoms of self-poisoning by food poisons, not neutralized or eliminated by bowels, liver and kidneys acting in harmony.

Beecham's Pills

help to remove the cause of this trouble. They act gently and safely, but also very efficiently.

Smallest Honey Bees

Dwarf Intests Bull Combs no Larger Than Child's Hand

In some of the East Indian Islands and on the mainland of Hindustan are to be found the smallest race of honey bees in the world.

The little creatures are known to entomologists as apic flora.

Their honeycombs are no larger than a child's hand, and the cells are about the size of a small pinhead.

The little creatures build the combs on the branch of a low tree, and as they have not to provide for winter, they work all the year through, raising broods like themselves.

In the same land there is a race of giant bees, apic dora, as large as a human child.

These monsters of the bee world build honeycombs that are from six to seven feet in length, four or more in width and that weigh from 300 to 400 pounds each.

Minard's Liniment Relieves Distemper.

Pigs in Alfalfa

Thrive on Alfalfa With One-Third Less Corn

While an alfalfa pasture will first make the pig happy it will soon make his owner happy also, for he will find that pigs on alfalfa pasture will grow into better pigs on one-third less grain than is required where they are fed in a dry lot. Also home grown grains can be used entirely, thus eliminating the purchase of high priced concentrates. Other pastures will, of course, serve to some extent the same purpose, but no other combines the amount of palatability, productivity, and permanency that are found in alfalfa.

Twenty to twenty-five spring pigs can be pastured per acre of alfalfa, from May 15 to September 15 without danger of injury to the alfalfa, and a light cutting of hay will be taken off besides in late June.

Minard's Liniment Co., Limited.

Gents—I relieved a valuable dog of mange with MINARD'S LINIMENT after several veterinarians had treated him without doing him any permanent good.

Yours Genuinely,

WILFRED GAGNE.

Proprietor of Grand Central Hotel, Drummondville, Aug. 3, '94.

Met the Emergency

Hotel Clerk—The gentleman in 201 says that his room is full of steam from the laundry.

Proprietor—He does? Add \$1.50 to his bill for a Turkish bath.

Monks introduced silk manufacture in Europe in the sixth century, having learned the art in China.

A Hidden Hand

A great game is being played in Ireland, but the Irish people are not the players, they are merely the pawns in the game. The real players on the Irish side are hidden. They are not in Ireland. This game has gone on for centuries and it will continue just so long as the Irish people will allow their blind hatred of England to make them easy tools for those who are interested in the destruction of England.

Edmonton, Alberta.

Death of Samuel McMullen

It is with regret that we
publish the notice of the
death of Samuel McMullen, of
Spenny Moor, Alberta. Death
took place in Empress, on Tues-
day morning, July 20, and was
caused by asthma and heart
failure. Deceased was well-
known through the countryside
and held the postmastership of
Spenny Moor. He was a mem-
ber of the Orange Order and of
the Episcopalian Church. He
was 68 years of age, and was
born at York Co., N. Dakota.

He leaves a wife and grown-up
family, two daughters, Doris
and a married daughter, Mrs.
W. F. Russell, and two sons,
Robert and Bertram. The
funeral took place from the
home of Mr. and Mrs. C. O.
Carlson, at 4 p.m., Wednesday,
July 21, the body being interred in
the Empress cemetery. The
sympathy of the community is
extended to the family in their
bereavement.

Copy for changes of advt
brought into this office after
noon on Mondays of each week
will POSITIVELY not be
taken notice of until the fol-
lowing week, unless other ar-
rangements happen to be made
with the publishers.

Thorough Lubrication

IMPERIAL Polarine can be depended on to give you thorough
lubrication, to keep the engine running quietly and faultlessly, to
take you a 100 miles or 1,000 miles at the least cost for fuel, oil and
repairs.

Imperial Polarine forms a piston-to-cylinder seal that maintains
compression and utilizes the full power of the fuel. It spreads a thin,
yet unbreakable oil film over every friction surface that minimizes
wear—it is the perfect lubricant.

Imperial Polarine will not break up under high operating heats.
It burns freely with hardly a trace of carbon. Costs less because it
saves depreciation and fuels. Sold in gallon and four-gallon sealed
cans, half-barrels and barrels, also 12½-gallon steel kegs, by dealers
everywhere.

Look for the Imperial Polarine Chart of Recommendations when you
buy oil. It shows which of the three grades described below is
recommended for your car. Use the grades specified, exclusively.

IMPERIAL POLARINE (Light medium body) IMPERIAL POLARINE HEAVY (Medium heavy body) IMPERIAL POLARINE A (Extra heavy body)
A GRADE SPECIALLY SUITED TO YOUR MOTOR
